TRON ISDN TERMINAL ADATPTERS

External professional ISDN adapter

TRON TA128

The TRON TA series offers the most advanced possibilities for flawless data transmission.
Allied Data Technologies introduces the quality-mark of data communication equipment.

The TRON TA128 is a transparent data centre, a professional external ISDN terminal and ideally suited for Internet use. The TRON TA128 is able to send and receive data with a digital line speed up to 128.000bps (2x 64.000bps).

The TRON TA128 also supports several business protocols. Moreover, the TRON TA128 can be connected to 2 PCs and through the POTS-connector, also to conventional telephone equipment. This means you do not need to buy an extra ISDN-telephone.
